

STEIN - Bentonite - mixing - plant 1,70 m³

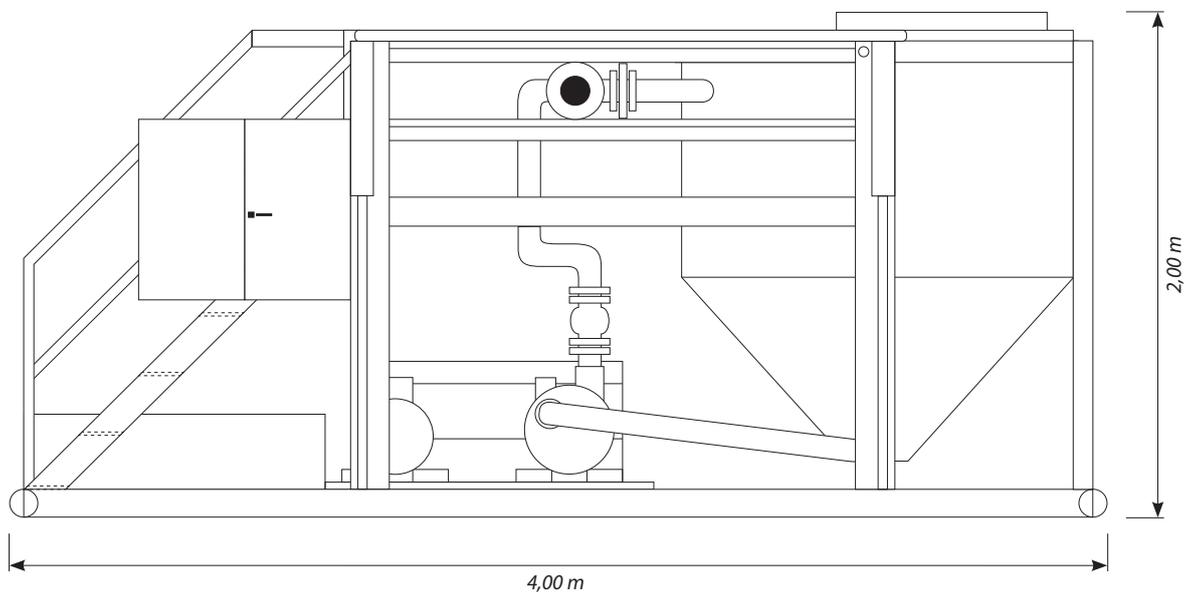

Mixing plant with folding sun shelter

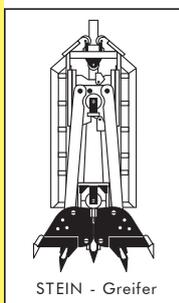

Batching plant for the mixing of liquid and powdery components. The equipment consists of a mixing tank including a mixing scale, an electrical mixing pump, several control valves and connecting piping. The fresh water inlet and the suspension outlet are marked as 4" fast clutch connections. Optionally it is also possible to mount "Storz" connectors. The feed of the powder can be achieved by using single bags or by using a scale and a screw-conveyor.

Colour: RAL 1007

Documentation: technical specifications, assembly instructions, service manual, spare part list, safety regulations.

Pump type	Victor impeller channel pump S120
Pump performance	ca. 150 m ³ / hour
Mixing	ca. 30 - 40 m ³ / hour
Three phase a.c. motor	18,5 kW
Electric connection	1 pc. 63 Amp. CEE-plug 1 pc. electrical outlet 230 V
Diameter of impeller	263 mm
Dimensions l/w/h [m]	4,00 / 1,80 / 2,00
Weight [kg]	2.500
